

Call Verified Leads

1

Consumer clicks on “click-to-call” or an agent calls a lead

2

Agent at the call center reads the pre-approved script which verifies the lead’s consent, intent, and qualification for the product offering

3

The agent then posts the lead information to PX, and PX posts it directly to your CRM

4

Your agent receives the lead information to call the consumer back and can start pitching to the prospect

With the PX marketplace, you have access to high-intent and verified callers who come to you

Dynamic pricing, actionable insights, and the control you get with the platform means that the money you spend on Calls goes further with PX.

Unlock Your Growth using PX Verified Calls at Digital Speed

Perfect solution if you have tech limitations to route warm transfers or tracking is challenging

Buy the right call verified leads for the right price, dynamically and programmatically

You only get posted 100% vetted, qualified, high-intent and compliant consumers

Make data-led decisions on the calls you accept with insights and reports on your call verified lead sources
